

Graduate-Entry Medicine for British and European Students

Dnipro Medical Institute (DMI) of Traditional and Non-Traditional Medicine is recognised by the World Directory of Medical Schools, General Medical Council in United Kingdom and Australian Medical Council. Our highly prestigious medical institute has almost 30 years of experience, traditions and history – founded in 1993. DMI is one of the most dynamically developing and high-tech higher education institutions in Ukraine.

Dnipro Medical Institute attracts great interest by international students from all over Europe and the world. Our passionate, welcoming and friendly faculty has attracted hundreds of enthusiastic students from over 90 countries, mainly Great Britain, Australia, America, Germany, Sweden and many other European countries. We pride ourselves on being one of the most diverse campuses in Ukraine with a wealth of experience in teaching students from all walks of life.

Dnipro Medical Institute was the first and only medical faculty to design and introduce European graduate-entry programs in Ukraine. These innovative programs are tailored toward British Bachelor-degree holders, who are seeking accelerated medical training that's fully taught in English and recognised worldwide.

At Dnipro Medical Institute, we are dedicated in providing you with comprehensive clinical training via a combination of problem-based-learning and traditional teaching. Our practical laboratories and state-of-the-art hospital facilities are equipped in accordance with the modern European requirements. Our main priority is to continuously advance quality and improvement in students' clinical training.

- Interactive 3D Anatomy Training and virtual microscopy complements the traditional cadaver-dissection practicals in the initial years of teaching.
- The latest clinical simulators offer high-quality practical training, such as Laparoscopic Surgery Simulator for advancing surgical techniques of young surgeons by innovatively recreating the intraoperative settings.
- 3D Technologies facilitate the student-patient clinical interactive hours, including 3D prototyping in dental medicine allowing students to develop dental models using 3D printers and 3D laboratory scanners.

The admission is selective and seeks out motivated students with strong academic performance. All European applicants wishing to apply to Dnipro Medical Institute's English-taught programs must communicate directly with our admissions teams on **0044 2039 813 913** in Europe and United Kingdom, or **00380 63 625 4757** in Ukraine.
